

Assignment 9

Q1. Modify assignment 5 – Q4 to save all accounts data into binary file and load it back. Also, provide additional facility to write all account details into a CSV file. Note that, CSV file is a text file in which columns are separated by comma.

Q2. Implement a Stack class using C++ templates. Test stack operations on `Stack<int>`, `Stack<double>` and `Stack<Box>`.

Q3. Modify assignment 5 – Q4 to save all accounts data into STL list. Provide additional facility to display all accounts in forward and reverse order using iterators.
